DETAILED ACTION

Allowable Subject Matter

Claims 1 – 11 are allowed.

The following is an examiner's statement of reasons for allowance:

In the examiner's opinion, none of the prior art references, taken individually or collectively, teach or anticipate the following limitations found in the independent claim: a vertical support unit provided with a generally L-shaped support element and a tire capture unit including a generally inverted L-shaped tire capture member which is movably associated with the vertical support rod member and having a vertical segment that is dimensioned to be slidably received in a the base plate member.

The prior art relating to vehicle mounted storage of tires without hubs is found in applications similar to Heil (2,377,149) and Burklund (5,449,031) where the tire is held within a box-like frame and Nichols et al. (1,881,222) where members hold the tire by the inner diameter. Nichols et al. provide the closest prior art but his disclosed device does not teach or anticipate a mechanism as described above, nor would it have been obvious to a person of ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
